

Unit	Lesson	Lesson Objectives
Medical Terminology		
		<p>Introduction to Medical Terminology</p> <ul style="list-style-type: none"> Build medical terms for specified definitions. Identify the origins of medical language. Recognize the four word parts and describe the use of the combining form.
		<p>Common Medical Root Words</p> <ul style="list-style-type: none"> Analyze medical scenarios based on root words. Build medical words based on roots, prefixes, and suffixes. Identify common medical root words.
		<p>Common Medical Prefixes</p> <ul style="list-style-type: none"> Analyze medical scenarios based on prefixes. Build medical words based on roots, prefixes, and suffixes. Identify common medical prefixes.
		<p>Common Medical Suffixes</p> <ul style="list-style-type: none"> Analyze medical scenarios based on suffixes. Build medical words based on roots, prefixes, and suffixes. Identify common medical suffixes.
		<p>Clinical Vocabulary</p> <ul style="list-style-type: none"> Apply knowledge of clinical vocabulary to medical scenarios. Discuss the background and usage of clinical vocabularies. Identify clinical terminology related to coding and coding professionals.
		<p>Healthcare Record Terms</p> <ul style="list-style-type: none"> Define terminology related to healthcare records. Explain the adoption of electronic health records based on "interoperability." Interpret medical documentation based on healthcare record terminology.
		<p>Health Information Technology Terms</p> <ul style="list-style-type: none"> Define health information technology. Explain how terminology affects the communication and documentation of health data. Identify terms and abbreviations related to health information technology.
		<p>Medical Safety Terms</p> <ul style="list-style-type: none"> Discuss medical procedures that require safety precautions. Identify terminology related to laboratory safety. Recognize safety practices in healthcare settings.
		<p>Medical Pathology Terms</p> <ul style="list-style-type: none"> Apply procedural terminology to practice medical scenarios. Explain medical terminology and abbreviations related to pathology.
		<p>Medical Diagnostic Terms</p> <ul style="list-style-type: none"> Apply diagnostic terminology to medical scenarios. Define medical terminology related to diagnostic procedures.

Unit	Lesson	Lesson Objectives
Medical Abbreviations		
Healthcare Industry Abbreviations		
Define terms related to healthcare systems.		
Identify abbreviations for regulatory agencies.		
Recognize healthcare delivery terminology.		
Disease and Disorder Abbreviations		
Analyze proper methods for documenting diseases and disorders.		
Apply knowledge of disease and disorder abbreviations to medical scenarios.		
Identify common medical abbreviations for diseases and disorders.		
Patient Status Abbreviations		
Analyze real-life medical scenarios involving patient care.		
Identify abbreviations found in medical charts and medical orders.		
Recognize abbreviations related to patient care.		
Healthcare Career Terms		
Combine word parts to form terms related to select health careers.		
Define common healthcare career terminology.		
Distinguish terminology associated with healthcare providers.		
Pharmaceutical Terms		
Pharmacology Terms		
Define pharmacology.		
Distinguish among the various uses for pharmaceutical drugs.		
Identify terms related to the field of pharmacology.		
Pharmaceutical Legislation, Manufacturing, and Testing		
Define terminology related to pharmaceutical legislation.		
Identify abbreviations related to drug regulations, manufacturing, and testing.		
Recognize the meanings of the five drug schedules.		
Drug Forms and Administration		
Analyze terminology related to the routes of administration.		
Identify the names and characteristics of manufactured drug forms.		
Recall the terms for the methods of administering intravenous medication.		
Prescription Terms and Abbreviations		
Define the various components of prescriptions.		
Identify common abbreviations used with prescriptions.		
Interpret prescription orders based on real-life scenarios.		
Drug Class Terms		
Define various drug classes.		
Demonstrate knowledge of drug classes based on real-life scenarios.		
Match body systems to particular classes of drugs.		

Unit	Lesson	Lesson Objectives
Anatomical and Physiological Terms		
Anatomical Terms		
Define anatomy.		
Define and spell terms related to body structure.		
Recognize anatomic structures of the human body.		
Physiological Terms		
Define physiology.		
Identify terms related to human physiology and body structure.		
Use physiological terms when describing body functions.		
Body Regions		
Define appendicular and axial body regions.		
Describe the anatomical position.		
Identify human body regions.		
Directional Terms		
Describe how the human body is organized.		
Identify the terms used to refer to directions of the body.		
Understand the relative location of body parts using directional terminology.		
Body Systems Terms I		
Integumentary System Terms		
Define and spell terms and word parts related to the integumentary system.		
Identify organs and components of the integumentary system and the medical terms associated with them.		
Use medical terms in sample medical documents.		
Integumentary System Pathological Vocabulary		
Define and spell disease and disorder terms of the integumentary system.		
Identify common diagnostic and treatment procedures for integumentary system diseases.		
Interpret medical scenarios using pathological vocabulary.		
Musculoskeletal System Terms		
Define and spell terms and word parts related to the musculoskeletal system.		
Identify organs and components of the musculoskeletal system and the medical terms associated with them.		
Use medical terms in sample medical documents.		
Musculoskeletal System Pathological Vocabulary		
Define and spell disease and disorder terms of the musculoskeletal system.		
Identify common diagnostic and treatment procedures for musculoskeletal system diseases.		
Interpret medical scenarios using pathological vocabulary.		
Digestive System Terms		
Define and spell terms and word parts related to the digestive system.		
Identify organs and components of the digestive system and the medical terms associated with them.		
Use medical terms in sample medical documents.		

Unit	Lesson	Lesson Objectives
		<p>Digestive System Pathological Vocabulary Define and spell disease and disorder terms of the digestive system. Identify common diagnostic and treatment procedures for digestive system diseases. Interpret medical scenarios using pathological vocabulary.</p> <p>Respiratory System Terms Define and spell terms and word parts related to the respiratory system. Identify organs and components of the respiratory system and the medical terms associated with them. Use medical terms in sample medical documents.</p> <p>Respiratory System Pathological Vocabulary Define and spell disease and disorder terms of the respiratory system. Identify common diagnostic and treatment procedures for respiratory system diseases. Interpret medical scenarios using pathological vocabulary.</p>
Body Systems Terms II		
		<p>Sensory System: Eyes and Ears Terms Define and spell disease and disorder terms of the eyes and ears. Define and spell terms and word parts related to the eyes and ears. Identify organs and components of the eyes and ears and the medical terms associated with them.</p> <p>Nervous System Terms Define and spell terms and word parts related to the nervous system. Define and spell terms related to behavioral health. Identify organs and components of the nervous system and the medical terms associated with them. Use medical terms in sample medical documents.</p> <p>Nervous System Pathological Vocabulary Define and spell disease and disorder terms of the nervous system. Identify common diagnostic and treatment procedures for nervous system diseases. Interpret medical scenarios using pathological vocabulary.</p> <p>Cardiovascular System Terms Define and spell terms and word parts related to the cardiovascular system and blood. Identify organs and components of the cardiovascular system and blood and the medical terms associated with them. Use medical terms in sample medical documents.</p> <p>Cardiovascular System Pathological Vocabulary Define and spell disease and disorder terms of the cardiovascular system and blood. Identify common diagnostic and treatment procedures for cardiovascular system diseases. Interpret medical scenarios using pathological vocabulary.</p> <p>Lymphatic System Terms Define and spell terms and word parts related to the lymphatic system. Identify organs and components of the lymphatic system and the medical terms associated with them. Use medical terms in sample medical documents.</p>

Unit	Lesson	Lesson Objectives
		<p>Lymphatic System Pathological Vocabulary</p> <ul style="list-style-type: none"> Define and spell disease and disorder terms of the lymphatic system. Identify common diagnostic and treatment procedures for lymphatic system diseases. Interpret medical scenarios using pathological vocabulary.
Body Systems Terms III		
		<p>Reproductive System Terms</p> <ul style="list-style-type: none"> Define and spell terms and word parts related to obstetrics and neonatology. Define and spell terms and word parts related to the male and female reproductive systems. Identify organs and components of the male and female reproductive systems and the medical terms associated with them. Use medical terms in sample medical documents. <p>Reproductive System Pathological Vocabulary</p> <ul style="list-style-type: none"> Define and spell disease and disorder terms of the female reproductive system. Define and spell disease and disorder terms of the male reproductive system. Define and spell disease and disorder terms related to obstetrics and neonatology. Identify common diagnostic and treatment procedures for female reproductive system diseases. Identify common diagnostic and treatment procedures for male reproductive system diseases. Interpret medical scenarios using pathological vocabulary. <p>Urinary System Terms</p> <ul style="list-style-type: none"> Define and spell terms and word parts related to the urinary system. Identify organs and components of the urinary system and the medical terms associated with them. Use medical terms in sample medical documents. <p>Urinary System Pathological Vocabulary</p> <ul style="list-style-type: none"> Define and spell disease and disorder terms of the urinary system. Identify common diagnostic and treatment procedures for urinary system diseases. Interpret medical scenarios using pathological vocabulary. <p>Endocrine System Terms and Pathological Vocabulary</p> <ul style="list-style-type: none"> Define and spell terms and word parts related to the endocrine system and the diseases and disorder terms of the endocrine system. Identify common diagnostic and treatment procedures for endocrine system diseases. Identify organs and components of the endocrine system and the medical terms associated with them.
