Imagine Español Students in Grades K–2 Outperform their Peers on the Spanish MAP® Growth™ Reading Test

OVERVIEW
During the 2020–2021 academic year, YES Prep Public Schools implemented Imagine Español with students in Grades K–2. On average, students used Imagine Español for eight hours and passed eight lessons. To measure the impact of Imagine Español on Spanish reading skills, Imagine Learning analyzed Spanish MAP Growth Reading data from 44 Imagine Español students and 44 nonparticipating peers.

RESULTS
From Winter 2021 to Spring 2021, Imagine Español students demonstrated significantly greater gains on the Spanish MAP Growth Reading test than their nonparticipating peers (Figure 1). Notably, second-grade students using Imagine Español significantly outperformed their nonparticipating peers, improving by six Rasch Unit (RIT) score points while their peers showed no growth. Similarly, when disaggregated by intervention tier, Imagine Español students in Tier 3 gained six RIT score points while nonusers declined by three points (Figure 2).
