

What's New for Back to School 2025

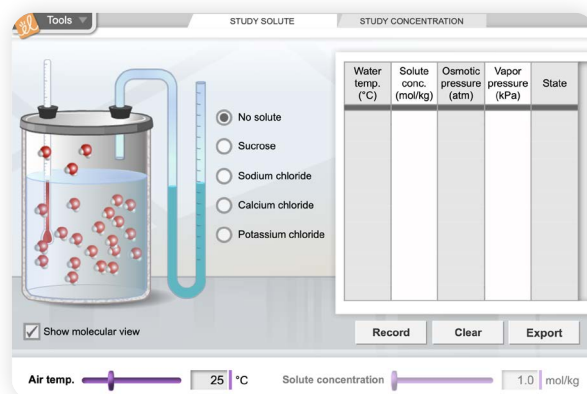

imagine school services

Imagine School Services is delivering expanded offerings designed to support all learners, so you can meet every student's needs with confidence.

imagine edgeEX

Instructors and tutors available for Imagine EdgeEX Courses

Our enhanced Imagine EdgeEX courses now offer even more interactive and motivating lessons designed to create an accessible experience. Students can easily track their progress and use built-in tools — like fillable guided notes — to take ownership of their learning. Plus, with remote teachers of record and on-demand tutors available right from their courses, students get the structured support they need to stay on track.

- Interactive features like virtual labs for chemistry courses keep students engaged

Instructional Services

Intelli-Sync expands to Spanish and middle school

Our live, synchronous instruction is now available for even more students! Intelli-Sync now supports middle school math, ELA, and physical science, plus high school Spanish I and II — helping districts fill critical teaching gaps with expert-led instruction.

Expanded certified SPED instruction

High school students in Exceptional Student Courses now receive direct instruction and support from a remote, SPED-certified teacher of record. Plus:

- Personalized 1:1 and small-group instruction help students build executive functioning skills and master content
- IEP-aligned learning plans are tailored to individual needs, with ongoing progress updates for families, school staff, and administrators
- SPED teachers and coordinators collaborate to meet accommodations and modifications, keeping schools aligned with IEP and 504 requirements
- Students have access to on-demand tutoring embedded within their courses, providing extra support to help them reach their goals

Additional support for English language learners

Students enrolled in Imagine Instructional Services courses who are also English language learners (ELLs) can now receive additional support from an ELL-certified Resource Specialist.

This remote pull-out service provides 1:1 support and cooperative learning sessions, helping students better access their general education curriculum while aligning with their ELL plans.

Our specialists work alongside district ELL teachers to reinforce learning, ensuring students receive the language support needed to engage with grade-level content and achieve their academic goals.
